

Always got your phone by your side?

Full Link makes it easy to manage your daily life by integrating a wide variety of compatible applications. Here are just a few examples of how Full Link makes your car into your best travel companion.

**Stay connected
with Full Link.**

SEAT is committed to continuous product and service improvement and may amend the specifications set forth in this publication without prior warning. [04/2019].

Ready to connect?

Take your life with you on the go by connecting your smartphone to your SEAT's infotainment system for easy and safe access to all your favourite apps.

Just ask your service advisor to activate Full Link in your car. In only 20 minutes, you and your SEAT will be ready to go.

Your link to the world.

Like to keep in touch with friends and family wherever you go? Never want to miss an important email again? Full Link puts your world at your fingertips.

Always connected. Always in control.

Full Link technology connects your Android or Apple smartphone* to your car's Modular Infotainment Board via USB, so you can manage music, apps and more directly from the touchscreen display.

*Compatibility depends on your country and availability of Android Auto™, Apple CarPlay™ and MirrorLink™.

MirrorLink™

MirrorLink™ technology mirrors the screen of your Android smartphone on your car's central display, so you can enjoy more functions without losing focus on the road.

Android Auto™

Does your phone use Android 5.0 or higher? Voice controlled Android Auto™ lets you manage Google services and compatible apps on the go.

Apple CarPlay™

Can't go anywhere without your iPhone? Interactive Apple CarPlay™ technology makes it easy to see and use all your apps on your car's large touchscreen display.

Your maps.

View and manage Google Maps, Waze or other maps apps directly on your SEAT's touchscreen. Integrated controls in the steering wheel and voice control make it easy to always know where you're going – without losing sight of the road ahead.

Your music.

What's your behind-the-wheel soundtrack? Use your car's integrated controls to search Spotify or other music apps for your favourite songs. Just one glance at the touchscreen shows you what's playing and what's coming next.

Your safety.

Never miss another message thanks to intuitive controls that make it easy and safe to send, read or listen to your messages without ever looking at your phone.
